

Create and assign a any policy at subscription level

Creating a policy definition

```
az policy definition create --name "my-public-ip" --display-name "Deny Public IPs"
--description "This policy denies creation of public IP addresses." \
--rules '{
  "if": {
    "allOf": [
      {
        "field": "type",
        "equals": "Microsoft.Network/publicIPAddresses"
      }
    ]
  },
  "then": {
    "effect": "deny"
  }
}' \
--mode "All"
```

```
az account show --query id -o tsv
```

```
az policy assignment create --name "my-public-ip-assignment" \
--display-name "My Public IPs Assignment" \
--policy "my-public-ip" \
--scope "/subscriptions/<subscription-id>"
```
